**BOBRICK**

BUILDING VALUE SINCE 1906

**B-38030 will change the way we dry our hands by offering the best of paper towels and warm air dryers in one ingenious unit.**

#### DESIGN

Sleek and sophisticated, B-38030 includes flush locks, a space-saving 100 mm cabinet depth, concealed flange and drawn satin-finished stainless steel doors. The minimalist characteristics of the TrimLine Series™ complement any washroom, from Class-A offices to fine restaurants.

#### SUSTAINABLE

Patrons can now combine a 900 watt, high-performance dual air hand dryer with a single paper towel to thoroughly dry hands. This unique combination in a centralised zone contributes to sustainable building operation by reducing paper towel consumption and electricity usage.

#### ECONOMICAL

Another exclusive feature of the B-38030 is its patented TowelMate™ accessory that ensures a single paper towel is delivered with each pull. TowelMate reduces paper usage by up to 20%. The unit also uses non-proprietary C- or multi-fold towels, allowing building owners and managers to source cost-effectively on the open market.

**B-38030 will significantly reduce paper consumption, energy use and waste while maintaining design aesthetics.**

**COMPLIANT**

This unit complies with accessibility design regulations\* by locating the paper dispenser, hand dryer air outlets and waste disposal opening within required height ranges. Additionally, the 100 mm depth enables B-38030 3IN1 to be fully recessed within standard-depth wall space.

**DURABLE**

Heavy-gauge type 304 stainless steel, tumbler locks and full-length piano hinges are just a few examples of the robust engineering that make the B-38030 long-lasting, vandal-resistant and easy to maintain.

For specification details, technical data and BIM objects visit our web site (see below).

Architects, building owners and facility managers around the world have selected Bobrick's performance-engineered washroom accessories with confidence for more than a century.

**BUILDING VALUE SINCE 1906**

\*Complies with Australian DDA, British Doc M, U.S. ADA standards when properly installed.

**B-38030 3IN1 incorporates a paper towel dispenser, warm air hand dryer and waste bin in a centralised drying zone.**

**Centralised Hand Drying Zone**  
for compliance and convenience

**TowelMate**  
provides single towel each time - compatible with almost any size paper towels

**100 mm Cabinet Depth**  
offers easy installation and maximum usable floor space

**Surface Mounted**  
optional skirt kit available, order part number 38030-98

**900 Watt Warm Air Hand Dryer**  
saves electricity without sacrificing performance, 230V operation

**Automatic Sensor**  
activates Hand Dryer when patron reaches for towel to encourage use of both

**Dual Hand Dryer Air Outlets**  
produce fast, comfortable and complete drying

**Dimensions**  
Unit: 396mm W x 1450mm H x 114mm D  
Rough Wall Opening:  
362mm W x 1412mm H x 100mm D
