

Three features in one. The only one. SureFlo™

LESS WASTE FOR ENVIRONMENTAL RESPONSIBILITY

Elimination of proprietary cartridges reduces post-consumer waste by as much as 57%. Additionally, the wasteful disposal of residual soap in cartridges is estimated at 10%-20% as a result of scheduled maintenance.

NON-PROPRIETARY FOR OPERATIONAL SAVINGS

SureFlo dispenses economical non-proprietary liquid or foam soaps available on the open market for savings of 80% or more versus proprietary cartridges. Investment recovery time for the dispenser averages one year.

TOUCH-FREE FIBRE OPTICS FOR INCREASED HYGIENE

Advanced fibre-optic technology ensures these soap dispensers activate when you want and not when you don't. There is no direct contact between the patron and the dispenser, preventing cross-contamination.
